A WORLD OF INNOVATION, A WORLD OF SUPPORT

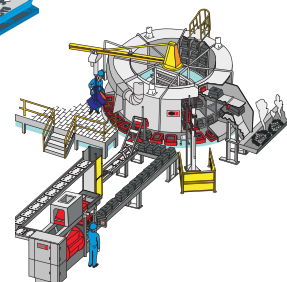

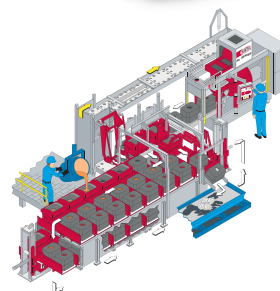

The XL Series

Hunter pioneered automatic matchplate molding nearly 50 years ago and has continued its commitment to innovation, since that time. This commitment has provided the world foundry market with better productivity in molding machinery and mold handling lines.

Through our international manufacturing and affiliate sales/service network, **Hunter** technology is delivered to your specification, on time and with full engineering and technical application support.

Hunter...solutions for foundries worldwide!
